

Fall Protection Classroom Preparation

BLR's Safety Training Presentations

OSHA's Fall Protection Requirements

- ☐ General Industry Fall Protection Standards are related to powered platforms and can be found in 29 CFR 1910.66. Appendix C of that same section also has some useful information.
- ☐ Construction Industry Fall Protection Standards are much more comprehensive and can be found in 29 CFR 1926.500.

Preparing Handouts and Training Props:

- ☐ Print out and make copies of the Fall Protection Quiz.
- ☐ Bring copies of your company's Fall Protection Program if you have developed one. This might contain information such as identification of fall protection hazards, procedures for protecting against hazards, types of fall protection to be used, etc.
- ☐ Bring a personal fall protection system that includes:
 - Harness and belt
 - Lanyard with decelerating device
 - Lifeline
 - Connectors
 - Anchors
 - Rope grab or retracting lifeline

Supplemental Information:

- BLR's *Preventing Slips, Trips, and Falls* booklet #200-044
